

Classifying Two-Dimensional Figures

Aligned with NCCS 4.G.2

By: J.R. Wheeler

- Classify two-dimensional figures with parallel or perpendicular lines.
- Classify two-dimensional figures by angle measurements
- Recognize right triangles as a category of two-dimensional figures
- Identify right triangles

Objectives:

2-D figures may be classified using different characteristics

Characteristics used to classify objects include:

- Number of sides
- Number of angles
- Length of lines
- Angle measurements
- Parallel lines
- Perpendicular lines
